FUNCTIONAL SUMMARY

I like giving service to societies for many reasons. I was brought up in a society where helping each other was considered as an obligatory routine. I have learn a great deal since childhood that money and wealth can never bring non-lasting pleasure. Instead sharing what you have with someone gives you the ultimate satisfaction. Further, I like giving services to others because; I believe that the world can be a better place to live for the further generation if we could ever work hard in hand today to eradicate the present problems.
